

### MaxiEST™ EST201

The MaxiEST™ EST201 is specially designed for safe and professional replacement of brake pads on a range of VW/Audi and Mercedes vehicles. Connecting to the vehicle's OBD II socket, this tool automatically links up with the control module. Disengaging the brake system, it increases safety with the push of a button. Eliminating the needs to use expensive OE diagnostics systems to do the job on electronic systems, the EST201 is a time saver and money maker!

#### Features

- Multi-brand applications-VW/AUDI & Mercedes
- Deactivate and re-activate the VAG EPB and Mercedes SBC
- Open and close the brake pads
- Read and clear EPB/SBC trouble codes
- Turn off the ECU and brake warning light
- Diagnose EPB/SBC caliper functionality
- Reset the brake pad thickness required for Audi A8 service
- Easy to use with step-by-step on-screen guided instructions
- Increase efficiency and ensure workplace safety
- Compatible with the latest CAN vehicles
- Large LCD screen, user friendly, simple and easy to use
- Free of charge online software update
